Abstract

WalleChat is a minimalist, crypto-focused message board where every wallet and token address has its own "Wall" for community discussions. Built on blockchain technology, it ensures transparency and authentic engagement by requiring wallet connections for posting. The \$Walley token, embodied by a rebellious hooded figure spray-painting bold opinions, powers the ecosystem, enabling pinned messages, rewards, and platform upgrades. Launching on Bonk.fun, WalleChat aims for organic growth as the go-to platform for crypto gossip, whale shade, and token insights. With all the different social media platforms crypto information is fragmented and scattered, WalleChat brings that information into a single spot, the Wall, for each token or wallet.

Introduction

WalleChat redefines crypto discussions by creating a decentralized message board where every wallet and token address has a dedicated "Wall." Like a public bulletin board for the blockchain, it organizes conversations around blockchain identities, cutting through the noise of traditional platforms. Users can check in on tokens, throw shade at whale wallets, or dive into the latest gossip—all in one transparent, community-driven space. All while remaining anonymous identified solely by wallet addresses.

Problem Statement

Current crypto discussion platforms:

- Scatter conversations across noisy, centralized systems.
- Lack direct links to blockchain identities, reducing authenticity.
- Fail to provide a single hub for wallet- or token-specific discussions.
- Compromise user control and privacy through centralized data practices.

Our Vision

WalleChat envisions a platform where:

- Every active wallet and token has a dedicated discussion Wall.
 - Users engage authentically by connecting their wallets to post.
 - The \$Walley token empowers users to amplify their voice and shape the platform.
 - Crypto communities thrive in a transparent, rebellious, and fun environment.
 - Getting messages out that would otherwise never be seen.
-

Platform Overview

WalleChat is a decentralized message board where users paste a wallet or token address into a search bar to view or start a discussion thread. Open for browsing, posting requires a connected wallet, ensuring authentic engagement. The platform is lightweight, fast, and designed for crypto enthusiasts to share gossip, insights, and shade.

Key Features

- **Wallet & Token Walls:** Each thread is tied to a wallet or token address, creating a dedicated space for discussions.
 - **Nested Comments:** Replies stack naturally, fostering clear and engaging conversations.
 - **Chain Detection:** Identifies wallet or token addresses across Solana and Ethereum (with plans for more chains).
 - **Sorting & Surfacing:** Highlights trending, new, or high-buzz Walls for easy discovery.
 - **Message Pinning:** Users can pay \$Walley to pin messages at the top of a Wall for increased visibility. (or similar features to come) Custom profiles, followers, verified, etc
 - **Authentic Engagement:** Wallet connection required for posting, tying contributions to blockchain identities.
-

Technical Architecture

WalleChat combines blockchain and decentralized technologies with a minimalist interface for a seamless user experience.

Blockchain Integration

- **Base Layer:** Supports Solana and Ethereum for address verification and wallet authentication.
- **Smart Contracts:** Manage wallet connections, thread metadata, and \$Walley transactions for premium features.
- **IPFS:** Stores thread content and user metadata for decentralization and scalability.
- **Links:** Direct links to referenced wallets and tokens for easy access to source information.

User Interface

A minimalist web interface built with React and Tailwind CSS, optimized for speed and simplicity. The search bar is the core feature, enabling instant address lookups. Web3.js (Ethereum) and Solana's Web3.js library handle blockchain interactions.

Tokenomics

The \$Walley token, inspired by a hooded figure spray-painting bold opinions, powers WalleChat's ecosystem. It drives advertising, rewards, and platform growth, launching on Bonkdotfun.com for organic community adoption. Walley is the degenerate inside us all.

Token Details

- **Total Supply:** 1,000,000,000 \$Walley.
- **Allocation:**
 - 4%: Marketing
 - 4%: Airdrops and Rewards
 - 4%: Operating Costs
 - 4%: Developer Wallet
 - 84%: Public sale
- **Use Cases:** Coming - Pinning messages for visibility, custom profile, new features and functions involving the website.

Reward Mechanism

- Users earn \$Walley for creating trending Walls or highly engaged posts.
- Paying \$Walley allows users to pin messages at the top of a Wall for a set period, ensuring visibility.
- Airdrops and rewards incentivize early adopters and active contributors.
- Staking \$Walley enables voting on platform features or governance proposals. (Possible in the future)

Roadmap

- **Q4 2025:** Launch WalleChat.com and \$Walley on Bonk.fun.com on Solana, basic Wall functionality, and wallet-based posting.
- **Q4 2025:** Enhance User Engagement - User facing Dashboard showing trending wallets/tokens analytics for premium users.
- **Q4 2025:** Utility for \$Walley token on the website.
- **Q1 2026:** Any changes brought forth by the community after extended use.
- **Q3 2026:** Release mobile app for iOS and Android, enhancing accessibility.
- **Q4 2026:** Multi-Language Support: Add support for additional languages to attract global crypto communities, especially in regions with high blockchain adoption (e.g., Asia, Latin America)
- **Will update as goals are met.**

Conclusion

WalleChat is the public bulletin board of the blockchain, where every wallet and token address comes alive with community discussions. Powered by the rebellious \$Walley token, it fosters transparency, authenticity, and bold discourse. Join us at wallechat.com to shape the future of crypto conversations. Every new social page has a beginning, a first, this is [WalleChat](https://WalleChat.com)'s first, add your mark.
